The game here is exceptional, with ten bucks scoring 170" or higher taken over the past decade and an annual average of five bucks exceeding 160". The largest buck ever killed in Mississippi with a bow was taken from this property in 2016. Managing the food sources on this property is nothing less than exceptional. Summer plots are planted with corn, sorghum, and beans and are harvested in late fall (if there is anything left), then the winter plots are planted. Also, there are feeders throughout the property that are utilized year-round to supplement the professionally managed nutrition program.

The deer population's genetics and quality are remarkable, making it an ideal destination for those aspiring to hunt Boone and Crockett-worthy deer. If you are an avid turkey hunter, you will be overwhelmed by the abundance of the turkey population on this property. Of all the properties I've sold over the last 21 years, this property has the strongest turkey population ever seen. For equestrian enthusiasts, there are approximately 50± acres of lush pastureland and seven well-appointed stables. The barn features a tack room, feed room, and ample space for you and your horses.
