There is a crack in the brick buttress wall to the fireplace on the north side of the downstairs bedroom. This was caused by a big tree that grew next to the house and was leaning on the chimney. I had the tree cut down several ~~years ago~~<sup>years ago</sup> years ago. It is a double fireplace with another fireplace in the adjoining den. The brick wall buttressing in that room does not show any cracks, just the one in the bedroom. Different sides of the same wall.

There are some visible cracks in the sheetrock of some walls around the house.

There is a visible crack in the exterior wall in the front of the house. It was there when I purchased the property in 2007.
